NEW QUARTERS FOR THE FIRE BOYS

Work began this morning on the new quarters for the fire boys at the city hall. A part of the auditorium will be cut off into a room sufficiently large for two or three beds, and a scuttle hole will be left in the floor through which the boys can slide down to the ground floor when an alarm is turned in. When this room is made ready, five or six of the boys will sleep there, and there will never be a time when there will not be a sufficient number on hand to deal with a fire.

ARDMORE WILL VOTE ON WATERWORKS BONDS

MOVING PICTURE LEC- TURES THIS EVENING

The train was originally scheduled to spend the night at Konawa, but when the men in charge found that there is no electric light plant there with which to operate their moving picture machine, they decided to return and deliver the lectures at the normal auditorium this evening at 7:30. The machine operator was left here when the train pulled out for Konawa, and will have everything in readiness when the time comes.

The reporter was told that most of the slides are new and are different from the ones used when the train stopped here some months ago, and that a number of new subjects are dealt with in these slides. Prof. Bittenbender will give an illustrated lecture on poultry. Prof. Churchill on increasing crop yields, and a number of moving pictures of life and work about the college will be shown. Besides these the life of a bee will be shown, also how dynamite is used in sub-soiling and blowing stumps out of the ground, and last and greatest of all, B. H. Burrell, a good roads expert employed by the national government, will deliver a moving picture lecture on the subject of road building.

Everything will be free, and it is urged that a full attendance be on hand at the normal auditorium this evening.

Mother's Club.

The Mothers' club of Willard school will meet at the school house tomorrow afternoon at 3 o'clock. Topic: "Questions Relating to the Things Which Make or Mar a Child's Happiness." A full attendance is urged.

THE A. & M. TRAIN VISITS ADA TODAY

EXCELLENT LECTURES AND EX- HIBITS—MOVING PICTURE LEC- TURES THIS EVENING.

About 11 o'clock this morning the A. & M. special, run by the Katy road reached Ada and remained about two hours while the lecturers discussed their respective subjects and the crowd went through the exhibit cars. Although the wind was uncomfortably cold, a crowd of possibly 2,000 was waiting at the depot when the train came and gave close attention to the lectures and examined the exhibits with keen interest. Although many citizens of Ada were present, a large part of the crowd was made up of farmers, many of whom had come quite a distance to hear and see what was offered. The train consisted of six or eight cars, and was in charge of Dean Pittuck of the A. & M. college, and R. W. Hoekaday and J. F. Riley, industrial agent and commercial agent, respectively, of the Katy system.

The first lecture was by Prof. H. A. Bittenbender, instructor in poultry management, A. & M. college. He had several chickens before him, and explained the strong and weak points in the birds. He also gave directions concerning the care of chickens, feed houses, etc. He was followed by J. W. L. Corley, member of the state board of agriculture, who spoke on the subject of agricultural education in Oklahoma. Prof. O. O. Churchill told of how crops may be increased by seed selection. Prof. W. A. Linklater made a short talk on the subject of corn, alfalfa and livestock. Prof. J. W. Wilkinson gave an outline of the plans the college has adopted in aiding boys and girls clubs. Marle Woodson, state superintendent of demonstration farm gave his hearers some valuable information concerning seed corn. Prof. R. C. Potts lectured on the subject of dairying and the best kind of diary stock.

After the lectures the crowd was invited to pass through the exhibit cars, where almost every product raised anywhere could be found. Of course the poultry car came in for a good share of attention. A number of birds of different varieties were to be seen, together with up-to-date appliances of value to the poultry raiser. The livestock and good seed exhibits also drew no little attention from those interested in these lines.

Attention, Sons of Veterans!

THREE CASES OF MENINGITIS

Child Dies at Vanoss, Another Ill. Dick Jones, Four Miles North of Ada, Also Attacked.

Three more cases of meningitis have developed in Pontotoc county within the past few days. Two of these affected were children of C. W. Groves at Vanoss. Dr. Hartman reports that one of them a nine-year-old boy, died late yesterday afternoon shortly before his arrival and that the other, a girl about 14 years of age, was resting very well when he left.

The other case is that of Dick Jones who lives three or four miles north of Ada. He was stricken yesterday morning, and his trouble was diagnosed as meningitis by Drs. Craig, Dawson and King. He has been given two or three injections of serum and is still alive.

Another suspicious case was reported from Tyrola, but Dr. Faust, county health officer made an examination and decided that it was not meningitis.

No cases are reported in town.

Haskell Announces for U. S. Senate.

Oklahoma City, Ok., Jan. 31.—Former Gov. C. N. Haskell today formally announced his candidacy for the United States Senate to succeed Robert L. Owen. Nomination is to be made in the democratic primary election next August. No specific mention was made in the statement given to the public to the term of office now being served by Senator Owen, yet there were pertinent references to the attitude that should be assumed by public servants in Washington toward some of the leading issues. The announcement, somewhat earlier than intended, came in response to the resolution in Woodward County last Saturday. Expression from one county, the former governor says, would not be accepted as conclusive on such an important question, except as it comes as a suggestion from an organized body of democracy following several thousand personal letters which he has received from all parts of the state, he says, asking him to become a candidate. The announcement itself is addressed as a letter to the Woodward county democracy and dated Muskogee, Jan. 30.

The grocer is a son of Mr. and Mrs. W. J. Reed, and has grown to manhood in this vicinity. He is a young man of good habits and applies himself closely to his business. He is the junior member of the firm of W. J. Reed & Son, and is making a success of his chosen work. The News wishes them a long and happy life.

REED-VAUGHN.

This morning at 10:30 Mr. Ernest Reed and Miss Venus Vaughn were married, Rev. C. L. Brooks officiating. They left on the south bound train for Denison and will spend a few days there and at Tishomingo before returning to their Ada home.

The bride has lived in Ada for a number of years and has an enviable reputation as a young lady of industry, strong personality and charming manners.

The groom is a son of Mr. and Mrs. W. J. Reed, and has grown to manhood in this vicinity. He is a young man of good habits and applies himself closely to his business. He is the junior member of the firm of W. J. Reed & Son, and is making a success of his chosen work. The News wishes them a long and happy life.

ANNOUNCEMENTS

The News is authorized to announce the following gentlemen as candidates for the offices named, subject to the action of the Democratic primary in August.

Register of Deeds
D. W. SWAFFAR

For Justice of the Peace, Ada, Pre-cinct:
H. J. BROWN

The first step in rising in life is to show a man that there are better things than he has hitherto been accustomed to enjoy. This is why there is much good to be accomplished by sending out these special trains by the A. & M. College. When the people are shown the possibilities of the state they will be more ready to adopt newer and better methods. Nothing like bringing the college into closer contact with the people.

Somehow, it is human nature to procrastinate. Every man feels inclined to put off doing today anything that might be carried over until tomorrow, and as long as a danger is not in sight, just drift along under the delusion that the sun will always shine and that there is no need of preparing for a storm. This is well shown in the matter of cleaning up a town. Disease must lay its hands upon them before the citizens realize the necessity of cleaning up. They are much like the inhabitants of Nineveh who went along in their riotous living until the prophet appeared and announced that the doom of the wicked city was but forty days distant. That is the only kind of preaching they would have heeded.

The first leaf was torn from the 1912 calendar this morning, and February was ushered in cool and bright. January will probably be remembered as one of the coldest months in the history of Oklahoma, and on that score no one has any regrets over its passing. As a month for business, it was probably up to the average for January, but in other lines it has been an improvement over the corresponding month of most years. It

Growing Exports of Automobiles from the United States.

Over twenty million dollars' worth of automobiles were exported from the United States in the calendar year 1911, or twenty times as much as a decade ago. The exports to foreign last year, including tires and other parts, were valued at \$1,263,661 and the shipments to our non-contiguous territories—Hawaii, Porto Rico and Alaska—\$1,843,165. Ten years ago the exports to foreign countries were but \$1,069,782 in value; by 1906 they had grown to \$4,409,186; by 1910, to \$14,030,226, and in the calendar year just ended had risen to \$21,636,61, this increase of twenty million dollars in the exports of American-made automobiles in a single decade being one of the most notable achievements of our foreign commerce in recent years.

Meantime imports of automobiles into the United States show a decreasing tendency. From 1902 to 1906, before the industry had developed in this country, imports rapidly increased from about a half million to five million dollars, the high record in imports of this class of vehicles. Since 1906, however, the imports have steadily decreased, last year's total having been less than \$2,500,000. In 1906, according to the published reports of the bureau of statistics, department of Commerce and Labor, imports and exports of automobiles were of about equal value, imports into the United States in that year being \$4,910,208, and exports therefrom, \$4,409,186. The following year witnessed a shifting of the balance of trade in automobiles from the import to the export side, since which time the exports have steadily increased until in 1911 it was \$19,190,413, imports in that year having been but \$2,446,248 and exports \$21,636,661, or about nine times the value of the automobiles imported in the same year.

The aggregate value of automobiles passing through ports of the United States during the last ten years exceeded one hundred million dollars. The approximate figures are as follows: Imports, \$27,000,000; exports to foreign countries, \$70,000,000; shipments to Porto Rico, Hawaii and Alaska, \$5,000,000, a total for this comparatively new article of commerce of \$102,000,000 in ten years.

Public Schools.

Says Hitchcock Juggled the Figures.

The attendance at the public schools is increasing at a rapid rate. The number actually present today was 941 which is a record breaker to date. The second, third and fourth grades are badly crowded at the High school, the total number enrolled in these grades today is 217 with an average attendance of 167. The only remedy for this conditions is increased teaching force.

Prof. Wilson of the A. & M. College addressed the pupils at the High school Wednesday morning. He gave some interesting figures proving the value of the child's time in school. He also stated that the average amount spent per capita for the education of children in the U. S. is \$30 and that Oklahoma is spending only \$15 on an average for the education of her future citizens. As a matter of fact Ada spent last year \$11.98 for the education of each of the 1367 pupils enrolled in her schools.

The patrons club at the High school will have a social meeting in the auditorium of the High school to which they have invited patrons and friends of the schools. This is a move in the right direction and we hope to see a large number out.

T. W. ROBISON,
Supt. of Schools.

Excavating Ancient Theater.

Verona, in Italy, is now completing the excavation of its Roman theater, a work which was begun in 1834. It is built in a semicircle. It dates from the time of Augustus Caesar and was lavishly decorated with marbles from Greece, Africa and Asia. The theater was formed of huge steps of granite above which were rows of private boxes, one of which stands in its original position, in excellent preservation, and with the name of the owner carved on it. Above the tiers of private boxes rose the places where the plebeians were seated and from where they looked down on to the stage or away to the water jousts on the river.

Physiological Facts.

A person's eyes are out of line in two cases out of five, and one eye is stronger than the other in seven persons out of ten. The right is also, as a rule, higher than the left. Only one person in 15 has perfect eyes, the largest percentage of defects prevailing among fair-haired people. The smallest vibration of sound can be distinguished better with one ear than with both. The nails of two fingers never grow with the same rapidity, that of the middle finger growing the fastest, while that of the thumb grows slowest. In 54 cases out of 100 the left leg is shorter than the right.

Proved His Right to Papers.

"Did the peanut man get his naturalization papers?" "Yes; he proved to the judge right away that he was a good American at heart." "How did he prove it?" "In answer to a question he told the difference between a double play and a double header."

Baseball Magnate Sues for \$100,000.

Lincoln, Neb., Feb. 1.—A damage suit for \$100,000 was filed today against the National Board of Arbitration, the National Association of Professional baseball clubs and the individual members of the arbitration board, including Secretary J. P. Farrell, by Guy Green, former owner of the Lincoln Baseball Club. Suit is filed in probate court.

Green alleges that in 1910 when he was engaged in independent baseball, Secretary Farrell cancelled a game and that he lost \$902 while playing at Auburn, Neb. Later he alleges Farrell wired the club there to cancel the game unless Green paid \$100. This was paid, says Green "under coercion."

Soon afterwards Green charges the official bulletin, the official publication of the National league, contained an article stating that Green had been fined \$100 for violation of the

rules of baseball. This article is alleged to have damaged the playing end of the game and his good name to the extent of \$100,000.

It is further alleged as a result of the publication Green was unable to get games the following year and was forced to sell his club for \$400. He alleges that he had been making a profit of \$5,000 a year from the club and asks an additional \$5,000.

Notice to Telephone Patrons.

We wish to notify all telephone patrons that we have moved the manager's office to the rear of the First National Bank Bldg., and all bills shall be payable at this place.

3rd PIONEER TEL. & TEL. CO.

"Our Poor Relations," shown at the DeSoto last night, was a lesson to all young men. The orchestra accompanied to this picture brought out the picture to its full worth.

Common Sense Suggestions.

Statistics show that \$14,500,000 were expended in 1911 in efforts to check the White Plague, and there has been appropriated \$12,000,000 to be used for the same purpose during the year 1912.

With the expenditure of this vast sum, there should be exercised the greatest care and judgment. There are a number of precautions that, while apparently insignificant when considered nationally, would save thousands of lives and millions of dollars and at the same time be put in practice with practically no expense.

There was a time when the common drinking cup and the roller towel were endured with no thought of its concealing the deadly tuberculosis bacilli, but with agitation and discussion of the danger through the press there followed legislation eliminating these hot-beds of germs.

We have long noticed the common habit of smokers, in buying a pipe, to take from eight to ten in their mouths and inhale and exhale violently through them to "try" it, thus depositing saliva which would afterwards be taken up and assimilated by others with the grave danger of infecting and transmitting tuberculosis, cancer or dreaded diseases.

Even if the party is pure and healthy, who relishes the idea of coming so closely in contact with him?

There is no question but as long as this practice is permitted, just so long will we be called upon to donate to the Anti-Tuberculosis society.

The State Board of Health has it in their power to stop this practice and we urge our readers to write individual letters to the board at Oklahoma City urging them to require all dealers in pipes to either sterilize all pipes after being placed in the mouth for trial or else provide a covering for the stem.

The above facts and suggestions come to us from listening to a common sense talk from a practical man—one who knows his subject E. E. Shirly, a prominent druggist from Western Oklahoma and is worthy of careful consideration.—New State Tribune.

Uncle G. Duncan went to Francis this morning to spend a few days. The cataract which has been growing over his eyes have reached the point where he is totally blinded. However, he will be operated on at an early date and expects to recover his sight.

NOTICE TO COMMITTEEMEN

DEMOCRATIC PRECINCT COMMITTEEMEN URGED TO MAKE STRONG EFFORT TO SECURE ATTENDANCE.

All members of the Central Democratic Committee of Pontotoc County are urged to make every possible effort to get out a good attendance of the Democratic voters of their respective precincts at their respective precinct conventions on the 10th of February. Remember, it is only two steps from the precinct to the National convention, and this year, when Democratic prospects are so flattering, it is the earnest desire of all who have the interest of the party at heart that a full expression of the sentiment of the party be had.

As stated heretofore, the hour of holding these precinct conventions is left to the judgment of the committeemen. Notify your fellow voters and get out a crowd. The plan for a primary has been abandoned by the state chairman, since there are no funds on hand with which to pay for the printing, so the precinct conventions will be held just as in the past.

Also, don't fail to be on hand at the meeting of the county committee Saturday, February 17, at 1 o'clock p. m.

Following is an official list of the precinct committeemen composing the Democratic Central Committee of Pontotoc county:

Ada, First Ward—Geo. A. Harrison.
Ada, Second Ward—Byron Norrell.
Ada, Third Ward—Geo. West.
Ada, Fourth Ward—B. C. King.
Capitol Hill—S. R. Treadwell, Ada.
Daggs—J. R. Lea, Ada.
Price School House—R. T. Dew, Ada.

Knox—B. V. Hampton, Ada.
Lawrence—M. Z. Nettles.
Egypt—S. C. Yancy, Ada.
Lovelady—J. H. Lovelady, Ada.
Ahloso—T. N. Herrin.
Union Valley—

Francis—R. E. Duncan.
Tyrola—Walter Simmons.
Oakman—W. M. Carter.
Allen—S. C. Burnett.
Steedman—J. R. Lambert.
Stonewall—I. H. Van Eaton.
Conway—W. H. Allison.
Frisco—G. H. Truax.

SIXTEEN MILLION MEN HARNESSSED AT NIAGARA

Niagara Falls, N. Y., Feb. 1.—The average man is apt to speak very glibly of so many hundred thousand horsepower harnessed at Niagara Falls, but it is doubtful if one person in a hundred begins to understand the tremendous conservation of natural resources effected at the Falls without interfering with the grandeur of the spectacle.

The 372,800 horsepower now developed at the Falls is the equivalent of 16,776,000 man-power working an eight-hour day, or more than the combined strength of all able-bodied men in the United States.

Under the American-Canadian treaty, promulgated by the two nations to guard the scenic beauty of the Falls for all time, only 56,000 cubic feet of water per second, out of a total flow of 240,000 cubic feet, may be diverted from the Niagara River for power purposes. But even with this restriction, when the treaty goes into effect the force conserved by falling water will be the equivalent of 35,559,000 men working the average eight-hour day.

Stupendous although this saving is, it is as nothing compared to the full strength of the Falls. The volume of water that will be permitted to run, so as to perpetuate the beauty of the Falls, is estimated to represent 118,680,000 eight-hour man-power or about 18,000,000 more man power than there are men, women and children in the United States and its possessions.

S.S.S. DRIVES OUT RHEUMATISM

Rheumatism is in reality an internal inflammation—a diseased condition of the blood cells which supply the nourishment and strength necessary to sustain our bodies. Uric acid, an irritating, inflammatory accumulation, gets into the circulation because of physical irregularities, and then instead of nourishing and invigorating the body, the blood irritates and inflames the different nerves, tissues, muscles and joints, because of its impure, acrid condition. The pains and aches and other disagreeable and dangerous symptoms of Rheumatism can never be permanently cured until every particle of the cause is driven from the blood. S. S. S. does this because it is a perfect blood purifier. It goes down to the very bottom of the trouble, purifies and cleanses the circulation, invigorates the blood, and completely drives Rheumatism from the system. Plasters, liniments, soothing lotions, etc., may be used for the temporary relief and comfort they bring, but a cure cannot be effected until S. S. S. has removed the cause. It frees the blood of every impurity and makes it a rich, healthy sustaining fluid, to bring permanent relief and comfort to those who suffer with Rheumatism. Book on Rheumatism and any medical advice free to all who write.

MORE COUNTY SEAT

TROUBLES AT JAY

Oklahoma City, Feb. 1.—That trouble is anticipated at Jay, Delaware county, in case an attempt is made to remove the county records from the court house in "Old" Jay to the building, which they formerly occupied in New Jay, and from which they were taken by Adjutant General F. M. Canton, acting under instructions of Governor Cruce, is indicated by two letters received Wednesday by Governor Cruce from Delaware county officials.

One letter was received from County Commissioner W. E. Carver, who says that trouble is threatened if the records are taken back to the new part of the town by order of the commissioners. He asks that General Canton again be sent to the county to see that no rioting follows the removal.

A similar request has been made by County Attorney Ad. V. Coppadge, who states that certain parties have kept the county officers under surveillance to see that the records are not disturbed. He says that General Canton's presence once insured quiet, and that in his opinion the fact that the adjutant general was again on hand would effectively put a stop to any prospect of rioting. If the records are moved without the presence of the adjutant general, he is convinced that there will be bloodshed.

To both of the letters, and to that received Tuesday, from Sheriff G. W. Hogan, Governor Cruce has replied that the state has no interest in the matter now, the records having been placed where the results of the special election showed that it was the intention of Delaware county citizens to have them, and that if they are again removed it is purely a county matter. He says, however, that if any disturbances arises by reason of the order of the county commissioners being carried into effect, the state then will take steps to quiet the disorder.

From letters received thus far, it is apparent that the county authorities want the records moved back, but

they are afraid to do so because of the citizens of the county do not want them moved again, and have threatened trouble if such action is attempted.

D. Love has purchased the Palace Cafe and hotel from R. F. Johnson. Mr. Love is an experienced hotel man and at one time conducted the Byrd. He will be remembered in Ada as the man who served the big banquet given in celebration of the location of the normal at Ada about three years ago.

SAGE AND SULPHUR Made Her Look Twenty Years Younger

READ MRS. HERRICK'S SWEORN STATEMENT

STATE OF NEW YORK } ss.: ROCHESTER, N. Y.

COUNTY OF MONROE }

Nancy A. Herrick, being duly sworn, deposes and says: When I was a girl I had a head of heavy, long, dark brown hair which was the envy of my friends and which attracted the attention and remarks of strangers, but as I grew older it commenced to come out. When my hair was quite thin and gray, I was induced by the many good reports I had heard of Wyeth's Sage and Sulphur to try a bottle; and you can imagine my satisfaction when I found my hair was fast coming back to its natural condition. I continued to use Sage and Sulphur until my hair was as heavy, dark and smooth as when I was a girl of sixteen. It is now four years since I began using Sage and Sulphur and my hair is in splendid condition.

Swear to before me this 16th day of July, 1902.
Henry W. Hall, Notary Public.

You Can Look Years Younger by Using

WYETH'S SAGE AND SULPHUR HAIR REMEDY

It is an Elegant, Refreshing Dressing

It Makes the Hair Soft and Glossy It Quickly Removes Dandruff
